

Invitation

Final conference

Work and challenges in testbeds

- How can one prepare for the development work in testbeds?
- How do you keep costs down?
- How to avoid mistakes?

Welcome to a webinar where we share experiences and lessons learned from product development in the food area. Participating is Anna Vanek, business developer at Balsgård Foodtech, which is a test bed for the development of plant-based innovative drinks. Balsgård welcomes established companies that want to develop with new technology, small companies as well as start-ups that are producing their first drinks.

We will also present a tool developed in the project AKUT (Amplifying the knowledge and use of testbeds), to help facilitate the work around testbeds.

There will also be an opportunity to ask questions about your particular challenges in working with testbeds.

Welcome to an afternoon that can be of help in product development, with both time and cost savings, in your journey towards finding a unique product.

Agenda

- About the project AKUT.
- Challenges and lessons learned in testbeds - Anna Vanek from Balsgård Foodtech.
- Identifying competencies needed in testbeds - Wisefour from Cyprus.
- Good practices in testbeds - Fita-Aragon from Spain.
