## Setting our next goals!

### Toolkit on Climate Change

The toolkit developed for youth work and young engagement in the scope of climate change is a comprehensive resource designed to support individuals and organizations working with young people to address climate change and foster sustainable practices. The toolkit includes various components that aim to provide valuable information and guidance. The toolkit's primary goal is to enable users to learn more about the latest European policies and strategies on climate change, particularly in the context of e-volunteering and digital activism. It aims to empower individuals and organizations to develop strategies and approaches that enhance youth work and youth engagement in climate change issues and foster social responsibility. The toolkit will be integrated into the projects' e-learning platform, it will be open and accessible to all, allowing individuals and organizations from various locations to benefit from its content and resources.
